Minerva Czech Republic selected as the supplier of a business information system for a door and door frame manufacturer

Prague, 27 June 2008

The Czech joint-stock company SOLODOOR a.s. is a successor of the wood-production division of the company SOLO Sušice a.s. It started manufacturing interior doors in 1998 and door frames in 2004. At present, SOLODOOR a.s. is a leading manufacturer and supplier of interior doors and door frames with a production of over 230,000 doors for domestic and foreign markets.

This March the company announced a public tender for the "Supply of a complex ERP information system." On March 25, SOLODOOR management opened sealed tender envelopes submitted by 15 companies. During the final evaluation procedure, the managers selected the QAD Enterprise Application system (QAD EA), and the contract was awarded to Minerva Czech Republic, a.s.

QAD EA will provide comprehensive support to all key activities of SOLODOOR a.s. in the field of production, quality control, company finance administration, and distribution management. In production the company will also use the Lean Manufacturing module and bar codes, which will also be used in distribution, including EDI communication with suppliers. The Preactor application will be used to assist SOLODOOR's advanced production planning. Modules for property record administration, human resource management and document management will also be provided. Together with the ERP system, Minerva will supply and install the necessary hardware: a server, mobile bar code readers, and an electronic attendance system. The project is divided into four phases, with regular operation planned for July 2009.

MINERVA is the exclusive provider of QAD Enterprise Applications in the Czech Republic and Slovakia and serves as a QAD distributor in Eastern Europe.

With a sharp customer focus, Minerva is an organization that helps production and distribution companies improve their overall company management with greater efficiency, control, and productivity through the implementation of information systems.

Minerva is capable of offering customers all services, from the installation of software and consulting to system integration and world-class e-business solutions. Years of experience on the market of enterprise resource planning (ERP) and more than 100 companies using QAD Enterprise Applications (previously MFG/PRO) in the Czech Republic, Slovakia, Russia, Lithuania, Ukraine and elsewhere confirm that customer satisfaction is a commitment Minerva takes seriously.
